Digital Marketing — Campaign Performance Report

Sample portfolio project • January – June 2026 • 6 channels • USD

AD SPEND	PAID REVENUE	CONVERSIONS	PAID ROAS	AVG PAID CPA
$251,842	$1,094,096	12,629	4.34x	$23

Key Insights & Recommendations

- **Return:** $251,842 of ad spend produced $1,094,096 of tracked paid revenue — a blended paid ROAS of 4.34x. Organic revenue ($166,438) is reported separately, never blended in.
- **Channels:** Meta Ads is the revenue engine ($314,363). TikTok leads paid social efficiency at 4.81x ROAS; Email returns ~18x on platform cost as the owned channel.
- **Watch out:** LinkedIn's CPA only pays back because its orders are worth ~2x the store average — judge it on revenue per conversion, not CPA alone.
- **Recommendation:** Shift 10–15% of the LinkedIn budget into TikTok creative tests, keep Google Ads on high-intent search, and grow the email list before buying more clicks.

Method

Data cleaned and checked with Python (pandas), then modelled in Excel with live-formula KPI dashboards, pivot analysis and native charts. The matching workbook (Dashboard, Data, Insights sheets) accompanies this report.

Sample portfolio project built on sample data to demonstrate the service. Client data is kept confidential and never reused.
